

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE AMERICAN MATHEMATICAL MONTHLY.

A MONTHLY JOURNAL DEVOTED TO PURE MATHEMATICS.
PUBLISHED UNDER THE AUSPICES OF DRURY COLLEGE AND
THE UNIVERSITY OF CHICAGO.

EDITED BY
B. F. FINKEL, A. M.
LEONARD E. DICKSON, Ph. D. **OLIVER E. GLENN, Ph. D.**

VOLUME XII. JANUARY - DECEMBER, 1905.

PUBLISHED AT DRURY COLLEGE,
SPRINGFIELD, MO.

INDEX TO VOLUME XII.

ALGEBRA (see Problems below).

AVERAGE AND PROBABILITY (see Problems below).

BOOK REVIEWS.....	28, 57, 58, 80, 99, 100, 119, 120, 147, 148, 167, 168, 101, 215, 241, 242
Emch's <i>An Introduction to Projective Geometry and Its Applications</i> , Rabinovitch's <i>The Foundations of the Euclidean Geometry as Viewed from the Standpoint of Kinematics</i> , Smith's <i>The Elements of Analytical Geometry</i>	28
Poincare-Halsted's <i>The Principles of Mathematical Physics</i> , Begeman's <i>Principles of Physics</i> , Robbins and Summerville's <i>Exercises in Algebra</i> , Johnson's <i>An Elementary Treatise on the Differential Calculus</i> , Davenport's <i>Statistical Methods with Special Reference to Biological Variation</i> , Cunynghame's <i>A Geometrical Theory of Political Economy</i>	57-58
Beman's <i>Academic Algebra</i>	80
Taylor's <i>A College Algebra</i> , Aley and Rothrock's <i>The Essentials of Algebra</i> , Merriman's <i>Elements of Mechanics</i>	99-100
Willmon's <i>The Secret of the Circle and the Square</i> , Lambert's <i>Plane and Spherical Trigonometry</i> , Withers' <i>Euclid's Parallel Postulate, Its Nature, Validity, and Place in Geometrical Systems</i> , Duncan's <i>The New Knowledge</i> , James' <i>Elements of the Kinematics of a Point and the Rational Mechanics of a Particle</i> , Newson's <i>Graphic Algebra for Secondary Schools</i>	119-120
Short's <i>Supplementary Algebra</i> , Clay's <i>Examples in Algebra</i> , Stone and Mills' <i>Essentials of Algebra</i> , Marsh's <i>Elementary Algebra</i>	147-148
Fine's <i>A College Algebra</i> , Ferris' <i>Elements of Descriptive Geometry</i> , Bush and Clarke's <i>The Elements of Geometry</i> , Halsted's <i>Biology and Mathematics</i>	167-168
Huntington's <i>The Continuum as a Type of Order</i> , Gibson's <i>An Elementary Treatise on Graphs</i> , Woodward's <i>Forces Due to Eccentric Weights Attached to Rolling Wheels</i> , Hawke's <i>Advanced Algebra</i> , Randall's <i>Elements of Descriptive Geometry</i>	191
Pierpont's <i>Theory of Functions of Real Variables</i> , Goursat-Hedrick's <i>A Course in Mathematical Analysis</i>	241-242

CALCULUS (see Problems below).

DIOPHANTINE ANALYSIS (see Problems below).

DISCUSSION. The Tangent Normals to a Limacon. F. H. Safford..... 225-227

ERRATA.....148, 168, 192, 242

GEOMETRY (see Problems below).

GROUP THEORY (see Problems below).

MECHANICS (see Problems below).

MISCELLANEOUS (see Problems below).

MATHEMATICAL PAPERS.

ANDEREGG, F. A Perfect Magic Square.....	195-196
CARMICHAEL, R. D. Six Propositions on Prime Numbers.....	106-108
CHURCH, ALICE. Tests of Divisibility by 7, 13, and 17.....	102-103
COLLINS, J. V. Uses of the Special Triple Product ab^2 of Extensive Quantities....	38-41
COREY, S. A. The Ballistic Problem.....	121-123
DICKSON, L. E. On the Cyclotomic Function.....	86-89
Graphical Methods in Trigonometry.....	129-133
Expressions for the Elements of a Determinant in Terms of the Minors of a Given Order. Generalization of a Theorem Due to Studnicka.....	217-221
GLENN, O. E. Note on Groups of Order $p^2 q^2$	101-102
GREENWOOD, G. W. Remarks on Definitions in Text-books on Geometry.....	104-105
HALSTED, G. B. Non-Euclidean Spherics.....	9-16
HARRIS, R. A. Numerals for Simplifying Addition.....	64-67
HAWKESWORTH, REV. ALAN S. Some New Ratios of Conic Curves.....	1-8
Same (continued).....	29-37
Some New Metrical Properties of Conic Curves.....	169-175

HONEY, F. R. Determination of the Radius of Curvature of the Cycloid without the Aid of the Calculus.....	103-104
LENNES, N. J. On the Motion of a Ball on a Billiard Table.....	152-155
LUNN, A. C. Outline of a Coherent Course in College Algebra.....	123-129
Maschke, H. A Useful Diagram for Examples in Modern Analytical Geometry....	193-195
MATZ, F. P. The Convex Surface of an Oblique Cone.....	67-68
MILLER, G. A. Note on the Totient of a Number.....	41-43
Application of Several Theorems in Number Theory to Group Theory.....	81-84
Groups Containing the Largest Possible Number of Operators of Order Two.....	149-151
MORITZ, R. E. A General Theorem in Local Probability.....	59-64
QUINN, J. J. On Kinematic Geometry—A New Inversor.....	105-106
ROSS, F. E. An Application of Stirling's Interpolation Formula.....	43-44
RUSK, W. J. Note on the n th Derivative of a Determinant whose Constituents are Functions of a Given Variable.....	85
SAWAYAMA, Y. A New Geometrical Proposition.....	222-224
STETSON, O. S. A Short Proof for the Number of Terms in a Determinant which are Independent of the Elements of the Principal Diagonal.....	84
ZERR, G. B. M. To Find the Equation to the Straight Line which is the Direction of the Resultant of a System of Forces Acting in One Plane.....	176-177

PROBLEMS.—ALGEBRA.

99. The "Seven" problem. Judson; Safford.....	68
211. Equal variables approaching different limits. Greenwood; Graber.....	16
212. Solution of certain biquadratic. Matz; Holmes, Westcott, Schuyler, Scheffer.....	16
213. Roots of certain quintic. Matz; Greenwood, Zerr.....	16
214. Number of terms in $(x_1 + x_2 + \dots + x_n)^n$. Epsteen; Greenwood, Owens, Scheffer, Zerr.....	17
215. Simultaneous equations $x/a + y/b + c/z = 3$, $x/a + b/y + z/c = 3$, $a/x + y/b + z/c = 3$. Rich; Scheffer, Shively.....	45
216. Solution of $x^6 + ax^4 + bx^3 + \frac{1}{4}a^2x^2 + \frac{1}{2}abx + c = 0$. Newcomb; Sherwood, Zerr.....	46
217. Condition that quintic be product of perfect square and perfect cube. Matz; Greenwood, Rich.....	46
218. $\sum_{r=0}^n \frac{c_r}{r+1} = \frac{2^{n+1}-1}{n+1}$. Epsteen; Greenwood, Hornung, Scheffer.....	47
219. Sum of $\frac{1.2}{3} + \frac{2.3}{3^2} + \frac{3.4}{3^3} + \dots$ Epsteen; Greenwood, Matz.....	69
220. Sum of $1 + \frac{m}{1!} + \frac{m(m+1)}{2!} + \dots$ Robinson; Heaton.....	70
221. Problem of elimination. Matz; Bareis.....	70
222. Square root of $87 - 12\sqrt{42}$. Walker; Meyer.....	70
223. Efficiency percents, clerks counting silver dollars in U. S. Treasury. DeLand.....	89

224. Eliminant of $(x_i+x_{i+1})(x_i+x_{i+2})=a_{i+1}a_{i+2}x_{i+1}x_{i+2}$ [$i \equiv 0 \ 1 \ 2 \pmod{3}$]
 equals $\begin{vmatrix} \pm a_0, & 1, & 1 \\ 1, & \pm a_1, & 1 \\ 1, & 1, & \pm a_2 \end{vmatrix}$.
 Greenwood; Miller 90
225. Covariancy of ternary cubic $\alpha^3 + \beta^3 + \gamma^3 - 3\alpha\beta\gamma = 0$.
 Armstrong 90
226. Set simultaneous equations in six variables.
 Schuyler; Holmes 108
227. Simultaneous higher equations, two variables.
 Hopkins; Matz 109
228. Sum of $\frac{1}{11.13} + \frac{1}{23.25} + \frac{1}{35.37} + \frac{1}{47.49} + \dots$
 Greenwood 133
230. Determinant n th order.
 Greenwood 134
231. Sum $\frac{1}{2.3.4} + \frac{1}{5.6.7} + \dots$
 Callecot; Epstein 134
232. Rate of increase of population.
 Matz; Hornung 134
233. Second hand of clock in given position.
 Keyes; Greenwood, Scheffer 135
234. $\sum (-1)^i (x+n-i)_n C_i = n!$
 Greenwood 155
235. Easter Sunday on April 23.
 Hoover 155
236. $\sum_{n=1}^{\infty} \frac{n^2}{(n+1)!}$.
 Shively; Newcomb 156
237. $x^2 + y + z = 12$, $x + y^2 + z = 8$, $x + y + z^2 = 6$.
 Matz; Newcomb 178
238. $\sum_{i=0}^{\infty} \frac{1}{(2i+1)(n+2i+1)} = \frac{1}{2} \sum_{i=0}^{\frac{1}{2}(n-2)} \frac{1}{(2i+1)(n-2i-1)}$.
 Corey; Scheffer 178
239. $\sqrt[4]{(41+x)} + \sqrt[4]{(41-x)} = 4$.
 Keyes; Tryon 180
240. $a^2x + b^2y = ax^2$, $bx^2 = (ax^2 + by^2)^2$.
 Matz; Greenwood, Holmes 180
241. $\sum_{n=1}^{\infty} \frac{n}{(n+1)!} = 1$.
 Newcomb; Schuyler 180
243. $\frac{1}{x} + \frac{1}{a} = \sqrt{\left(\frac{1}{a^2} - \sqrt{\frac{1}{a^2x^2} + \frac{1}{x^4}}\right)}$.
 Hoover; Schuyler 243
245. Diameter of shell volume one fifth of sphere.
 Jones; Beck, Corey 227

AVERAGE AND PROBABILITY.

155. Odds in crap game. E. B. Wilson 76
157. Probability that the circle through three random points within a second circle lies within the latter. Walker, Zerr 76

158.	Probability that arc in square is greater than its side. Matz; Finkel.....	113
159.	Number draws to draw all of n tickets in a box. Sanders; Landis.....	114, 141
160.	Triangle in circle. Matz.....	142
162.	Average area of segment. Matz.....	156
165.	Average length of lines parallel to diagonal of square. Heaton; Carmichael, Sanders.....	181
166.	Average area between two chords. Matz.....	181
168.	Average triangle sum of two sides= $2a$. Scheffer; Zerr.....	197
169.	Average length of all lines in a square. Heaton; Finkel, Zerr.....	198, 227
171.	Chance of ship striking derelict. Glenn; Zerr.....	199
172.	Average length of all lines in a triangle. Sanders; Zerr.....	228

CALCULUS.

185.	Altitude of cone, base equal maximum elliptic section. Holmes; Zerr.....	22
186.	Definite integrals $\int_0^\infty \frac{\sin my}{y} dy$; $\int_0^\infty \frac{\cos my}{y} dy$. Epsteen; Corey, Posey, Schottenfels.....	22
187.	Area of ellipse $x=a_1+a_2\cos\theta+a_3\sin\theta$, $y=b_1+b_2\cos\theta+b_3\sin\theta$. Jackson; Leonard, Zerr.....	52
188.	$I = \int \frac{y(y^2+2)dy}{(y^4+3y^2+3)^{1/2}(y^2+1)}$. Epsteen; Beman, Hornung.....	53
189.	Solution of $d^2y/dx^2 = -\beta^2(p+y)$. Sanders; Epsteen, Stayton, Stoker, Whitaker.....	73
190.	Evaluation $\int_0^\infty \frac{\sin x \cos \beta x}{x} dx$; $\int_0^\infty \frac{\sin ax \cos x}{x} dx$. Epsteen; Schottenfels.....	74
191.	Path of fly moving from hub to rim of carriage wheel. Sanders; Greenwood, Zerr.....	92
192.	Volume of hyperellipsoid of $2n$ and $2n+1$ dimensions. Zerr.....	83
193.	Eccentricity of maximum semi-ellipse inscribed in isosceles triangle. Matz; Zerr, Holmes.....	94
194.	Volume of certain solid of revolution. Greenwood; Carmichael, Greenstreet, Tryon.....	111
195.	Plane bisecting a cone. Hornung; Holmes.....	137
196.	Minimum tangent to ellipse. Matz; Greenwood.....	138
197.	$\int_0^\infty \frac{\sin mx \cos nx}{x} dx$. Carmichael; Greenwood, Graber.....	138
198.	$e \int_1^\infty, e^2 \int_1^\infty, \dots, e^n \int_n^\infty z^p [(z-1)\dots(z-n)]^{p+1} e^{-z} dz$ are integers, etc. Graber.....	138
200.	Equation of curve, area $y-x$. Carmichael; Zerr.....	156
201.	$\int \int_0^{dy/dx} \frac{dw}{1+w^2} = 0$. Matz; Zerr.....	182
202.	Primitive of $y=2px+ap^2$. Greenstreet; Greenwood.....	182

203.	$\int_0^\pi \frac{\sin mx}{x} dx.$	
	Corey; Zerr	200
204.	Variation of $\int V dx.$	
	Grabner	200
205.	$\int_0^{\frac{1}{2}\pi} \log \sin x \, dx.$	
	Jackson; Sanders	201
206.	$\int_0^1 (1-z^n)^m \frac{\partial}{\partial z} \log(1-z^n x^n) dz.$	
	Glenn; Zerr	209
207.	$\int_0^1 \frac{K d\kappa}{1+\kappa} = \frac{1}{8}\pi^2.$	
	Matz; Corey	230
208.	$(a^2+x^2) \frac{d^2y}{dx^2} + 2x \frac{dy}{dx} = 0.$	
	Matz; Holmes	230

DIOPHANTINE ANALYSIS.

123.	Determination of all possible numbers of five not-square factors such that their 10 digits form a permutation of 0 1 2...9; sum is 9×3951 . Dickson	94
124.	Three square numbers whose sum is a cube. Three cubes whose sum is a square number. Matz; Scheffer	113
125.	$(x+7)(x+5)/(x-7)(x-5)$ a perfect square. Matz; Zerr	113
126.	Number of evenings for eight players to play tournament progressive duplicate whist. Thompson; Holmes	141
127.	Three cubes whose sum is product of two squares. Matz; Holmes, Sanders	
128.	Highest powers of 2, 3, 5, 7 in 1000! Matz; Greenwood, Glenn	202

GEOMETRY.

236.	If two sides of a triangle pass through fixed points, the third side envelopes a circle. Hitt; Zerr	58
239.	Side of a triangle divided into segments in duplicate ratio. Greenstreet; Greenwood, Scheffer, Zerr	18
240.	Radii of circum-circle and in-circle. Burleson	19
241.	Harmonic pencil, related to conics with double contact. Epstein; Posey, Zerr	21
242.	Length of certain lines in trapezoid. Baker; Greenwood	21
243.	Locus of in-centers of right triangles, given hypotenuse. Matz; Greenwood, Shively	49
244.	Equilateral triangles related to given triangle. Anthony; Armstrong, Greenwood	49
245.	Construction of certain minimum. MacLagan-Wedderburn	50
246.	Parallel lines related to ellipse. Greenstreet; Greenwood, Scheffer	51
247.	From two given points without a circle to draw two lines meeting on the circumference and making equal angles with the tangent at that point. Pratt; Matz	71
248.	Construction of third proportional. Hornung; Bareis, Carmichael, Jones ..	71
249.	To construct a square, given distance of three vertices from a point. Beman	72
250.	Same as 249 for equivalent triangle. Beman; Hopkins, Posey	72
251.	Sides and area of triangle formed by joining any three vertices of a regular polygon. Carmichael; Greenwood	91
252.	Path of ray reflected from plane mirrors inclined at angle 45° . Honey; Linquist, Wells	91
253.	Height of cylinder in sphere. Jones; Greenwood, Holmes, Linquist	92
254.	Equations tangent-normals of a cardioid. Greenstreet, Safford	157

255.	Envelope of line joining extremities of two conjugate diameters of ellipse. Scheffer; Greenwood, Greenstreet	110
256.	Points of intersection of bisectors of angles of quadrilateral concyclic. Matz; Carmichael, Greenwood, Honey, Holmes	111
257.	Construction of equilateral triangle related to given triangle. Hopkins, Scheffer	135
258.	Tangents to ellipse subtending equal angle at focus. Finkel, Scheffer	136
260.	Radius of curvature of certain locus. Greenstreet, Greenwood, Zerr	183
262.	Ratio diagonal : side=2 apothem : radius of pentagon. Roray; Berg	159
263.	Construction of sphere cutting four given spheres in great circles. Honey; Greenwood	203
264.	Ratio of certain arcs in circle. Finkel; Zerr	204
265.	Equation of orbit when time in falling is proportional to square of distance. Carmichael; Hoover	
266.	Feet of perpendiculars from circumcircle to sides collinear. Glenn; Graber	
268.	Inscribed regular polygon. Scheffer; Beck	231
269.	Area of segment. Scheffer; Berg	231
270.	Part of heavens in occultation. Honey; Scheffer	231
271.	Area of quadrilateral circumscribing two ellipses. Greenstreet; Greenwood	231
272.	Roulette locus. Carmichael; Greenwood	232

GROUP THEORY.

7.	Linear substitution transforming $x_1 x_2 + x_3 x_4 + x_5 x_6$ into given conjugate. Graber; Epstein	
10.	Order automorph certain group. Glenn	205
11.	Six parameter group leaving invariant $x_1 x_2 + x_3 x_4 = 0$. Epstein	232

MECHANICS.

170.	Moment of inertia of ogival head. Graber; Brown	76
173.	Leap of squirrel in rotating cage. Lawrence; Finkel	139
174.	Striking force of hailstone. Matz	112
175.	Cylinder and sphere on inclined plane. Lawrence; Greenwood	112
176.	Force required to overturn a cube. Holmes; Hornung	140
178.	Work done dragging weight up cone. Anderegg; Greenwood	
179.	Motion in a cycloid. Matz	140
180.	Path of orbit when resistance varies as square of velocity. Rich; Zerr	159
181.	Roulette locus. Anderegg; Safford	233
182.	Time for pump to fill given standpipe. Zerr	183
184.	Rocking sphere. Zerr; Hoover	207
185.	Motion of flexible rope. Sanders; Greenwood	233

MISCELLANEOUS.

144.	Number of spherical polygons of n sides formed by arcs of n given great circles on a sphere. Delong; Emch	76
146.	A trigonometric identity. Matz; Holmes, Graber, Shively	24
132.	Arrangement of soldiers on square so that each rank and each file shall have an officer of each grade and each branch. Gruber; Dickson	95
146.	What year begins and ends on Sunday? Matz; Hoover	115
147.	Equation curve whose hodograph is a cardioid. Matz; Greenwood, Hoover	115
148.	Relation among angles in a triangle. Matz; Greenstreet	143
149.	Solution of $\sin 3\phi + \cos 3\phi = m$, $\cos \phi - \sin \phi = x$. Matz; Scheffer	160
149a.	$\sin^{-1}u + \sin^{-1}v = \frac{1}{2}\pi$. Matz; Sanders	185
150.	$\sin \phi = m \sin \theta$. Maximum of $\sin(\phi + \theta)/\sin(\phi - \theta)$. Haun; Holmes, Zerr	185
152.	Density of electricity on charged sphere. Sanders; Graber	234
153.	Meeting of daytime travellers going in opposite directions from Columbus, Ohio. Hornung; Holmes	234
154.	Angle to cross muddy roadway. Biddle; Zerr	235
